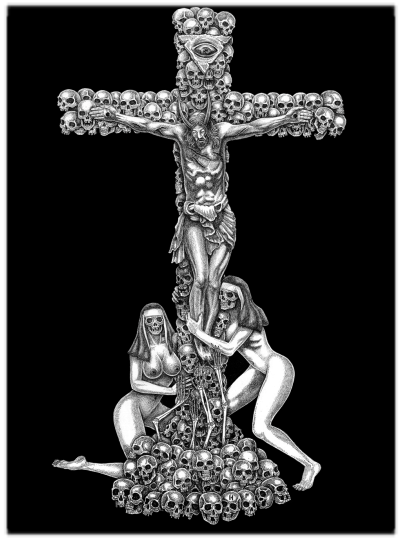
Boris Kalyuzhnyy Graphic Design

Born and raised in Odessa, Ukraine, Boris K moved to US in '97. He has always had a dream of making a living doing what he loves most, and that is Drawing. Boris is a self taught artist whose talents are through hard work and dedication.

"I draw whenever I have time, on the train, on my breaks at work, while I'm at home, or even hanging out with my friends - I always find myself sketching one thing or another." ~ Boris K.

To put it best, his inspiration comes from many things, such as history, religion, music, comic books, television, even the mood swings.



I don't know if I can say that I have a style, but I'm really drawn to monochromatic work. I also really enjoy doing intricate and detailed pieces. Where most people find drawing so detailed - tedious, I find it exciting and relaxing at the same time. I always say this: I will work on the project as long as it takes, and in the end it will be exactly what is asked of me or better. I have been doing this as long as I can remember. As with everyone, I picked up a pencil when I was a kid, to color a book or draw my favorite super hero. The only difference is that I never put it down since. ~ ***Boris K***

Boris Kalyuzhnyy

My clients satisfaction plays a very important role in. "Some of my drawings I spend weeks on, where one arm or leg would be hours worth of work, because of how much I try to make it look it's best.
